F.No. JSEZ/CUS/10/2022-23/

Date:- 04.08.2023

It is been observed that some of the units in zone are not performing as per the projections given in their Form F/Form F1 and on most of the occasions their performance in the block period is not sufficient enough to even pay their operation and maintenance charges of the premises allotted to them. This has not only affected the performance of the zone against the projections but also resulting in blocking the space, which can be used for better economic activities.

The matter has been examined keeping in view of Department of Commerce circular dated 31.12.2013 in connection with streamlining of Regulatory mechanism of Gems & Jewellery SEZ sector and it has been decided to lay down following guidelines to identify such poor performing units and take necessary action to increase the economic activities from the zone:

(A) Identification of 'Poor Performing unit(s)'

Following parameters will be kept in view for identification of such '**Poor performing unit(s)**':-

(i) The units which are making less than three physical exports (barring SEZ to SEZ) in a particular year or

(ii) The units which have made **negligible** exports i.e. <10% of the projected exports in in a block period of five years; or

(iii) The units whose average employment in the manufacturing activities (Other than Guard/cleaning staff) is <20% of the projected employment in in a block period of five years; or

(iv) The units whose NFE is negative over a block period of five years; or

(v) The units which have not consumed the opening balances of the raw material since long and are continuously showing the same in its APRs, instead they procured fresh raw material at the time of exports in a particular year; or

(vi) The units which have been kept under monitoring previously by the Approval Committee or DC, NSEZ, Noida due to their poor exports performance.

(B) Monitoring mechanism of such poor performing unit(s)

- i. The zone will maintain a list of Poor Performing units for monitoring their work;
- ii. Verification of the Premises of such units would be undertaken by the Specified Officer or entrusted officers on his behalf to divulge the correct position of Machinery, Tools, Raw-Material, Electricity & Water Connection, Labour position etc. at every instance of Import/Export/DTA Procurement or in the case of renewal of LOA. Every Import/DTA procurement/Export consignment of such poor performing Units will be examined/verified by team of two officers including the PO at the gate.;
- iii. A report would be provided by the verification team for placing in the next UAC and
- iv. UAC would examine these reports and take a suitable decision.

This issues with the approval of Development Commissioner, NSEZ.
