

Capgemini NSEZ Center of Excellence in Skilling

Empowering India's Youth through Skill Development

Capgemini, a global leader in technology services and consulting, has partnered with the **Noida Special Economic Zone (NSEZ)** to launch a first-of-its-kind Center of Excellence in Skilling in **Noida, Uttar Pradesh**.

This collaboration aims to help incentivize **skill development** and **digital literacy** in India by reaching out to unemployed and vulnerable youth.

The center will provide hands-on training and industry-relevant skills to empower the local youth and prepare them for the evolving job market.

Courses will cover a range of in-demand skills, including **robotics**, **artificial intelligence**, and **cloud computing**, equipping participants with the necessary expertise to thrive in the digital economy. The center aims to train 1000 youths annually, with a specific focus on **GenAI** and **robotics**, aligning skilling programs with industry requirements.

The state-of-the-art center includes facilities such as **classrooms**, a **computer lab**, a **counselling area**, and a **science, technology, engineering, and maths (STEM) lab** equipped with **Coding, Tinkering, and Robotics** facilities for government school teachers and students, creating a conducive learning environment.

The center aims to provide digital literacy training to over 1000 people from **socially and economically marginalized communities**, fostering digital inclusion. With a focus on **underprivileged youths**, the center promotes **digital inclusion** and **gender diversity** by providing specialized training to women and persons with special needs.

For any queries, interested participants can contact **Mitali** at **9901604638**.
